Alex,

We are already being generous by allowing these things to be twisted by 0.38".
I believe these are ALL scrap.

David

Subject: 350 crosstube deviations

David,

I have the following 350 crosstube deviations:

WO: 98956, 99679

Both these crosstubes are over tolerance on the twist, 0.116 and 0.023 respectively. I would consider these acceptable and don't see any fitment issues since the landing gear is completely assembled loosely prior to applying final torque.

WO: 95045

This one was previously accepted for being under tolerance on the half span, however, the twist is way out (1.36 over tolerance). I think this one is scrap.

Alex
